

Reg. No.: 3104/2007 M.O.H

# KETODEL

Injectable Solution

## Composition

Each 1 ml contains:

**Ketoprofen** 100 mg

## Properties

Ketoprofen is a propionic acid derivative of non-steroidal anti-inflammatory drugs. Ketoprofen has been shown to have a potent activity against acute, subacute and chronic inflammation.

## Mode of action

Ketodel 10% acts by inhibition of prostaglandin synthesis through interference with cyclo-oxygenase pathway of arachidonic acid metabolism.

## Indications

### In Horse, Cat and Dog

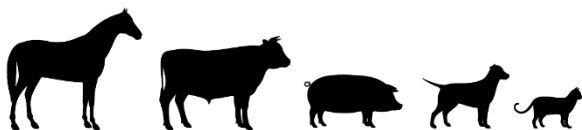

1. The alleviation of inflammation and pain associated with musculo-skeletal disorders, colic, osteo-arthritis, hip dysplasia, disc disease, spondylosis and trauma.
2. For management of post-surgical pain.
3. For the symptomatic treatment of fever when the inflammation and/or fever associated with primary infection.

### In Cattle

Is recommended for the symptomatic treatment of fever, pain and inflammation associated with a variety of conditions including respiratory tract infection, mastitis, udder edema, downer cow syndrome, endotoxemia, simple gastrointestinal disorders, arthritis and traumatic musculoskeletal injuries.

### In Swine

Is recommended for the treatment of fever and inflammation associated with respiratory infections.

## Dosage and route of administration

By I/M, I/V, S/C injection

For Active Ingredient:

**Cattle** 3 mg ketoprofen/kg b.wt. once daily for up to 3 days by I/V or I/M injection.

**Horse** 2.2 mg ketoprofen/kg b.wt. once daily for 3-5 days by I/V injection.

(in case of musculoskeletal disorder and equine colic repeat the dose once only).

**Dogs** 2 mg ketoprofen/kg b.wt. once daily for up to 3 days by S/C, I/M, I/V injection.

**Cats** 2 mg ketoprofen/kg b.wt. once daily for up to 3 days by S/C injection.

**Swine** 3 mg ketoprofen/kg b. wt. as a single dose by I/M injection.

For Whole Product:

**Cattle** 3 ml Ketodel 10%/100 kg once daily for up to 3 days by I/V or I/M injection.

**Horse** 11 mg ketodel 10%/500 kg once daily for 3-5 days by I/V injection.

(in case of musculoskeletal disorder and equine colic repeat the dose once only).

**Dogs** 0.2 mg ketodel 10%/10 kg once daily for up to 3 days by S/C, I/M, I/V injection.

**Cats** 0.1 mg ketodel 10%/5 kg once daily for up to 3 days by S/C injection.

**Swine** 3 ml ketodel 10%/100 kg as a single dose by I/M injection.

## Warning and precautions

1. Caution with use in animals less than 6 weeks of age or aged animals.
