

Reg. No.: 2390/2018 M.O.H

# TONOZAL

Injectable Solution

## Composition

Each 100 ml contains:  
Butaphosphan 10 gm  
Vitamin B12 5 mg

## Properties

The phosphorous substance involved in assimilating all body processes. They stimulate the energy metabolism. **Phosphorus** is a bone mineral supplement. **Vitamin B12** is involved in carbohydrate metabolism (gluconeogenesis) and lipids, the formation of red blood cells, and the biosynthesis of methionine.

## Indications

**In cattle, dog, and cats:** Prevention and treatment of hypophosphatemia and/or vitamin B12 deficiency.

## Dosage and administration

### For whole product

#### Cattle: I/V

10 to 25 ml per animal.

#### Calves:

5 to 12.5 ml per animal.

#### Dogs and cats: I/V, I/M or S/C

0.5 to 5 ml per animal.

Repeat injections, if necessary daily.

In chronic, administer half doses above and, if necessary, repeated after 8-15 days or a shorter period if necessary cases.

## Warning and precautions

The solution should be warmed to body temperature before administration. During the post-partum problems (tetany, paresis) the product is indicated as an adjunct to calcium and/or magnesium.

## Contraindications

Do not freeze.

## Side effects

None Known.

## Withdrawal time

Meat: zero time.

Milk: zero time.

## Storage condition

Store at a temperature not exceeding 30°C and use after opening for 40 days at a storage temperature not exceeding 30°C.
